

# CD200M Dri-Prime® Pumps

The Godwin Dri-Prime 8" (200mm) CD200M automatic priming centrifugal pump is clearly a standard for the temporary portable pumping industry. With solids-handling to 3" (75mm), maximum flows of 2300 gpm (145 l/sec.) and 170' (51.8M) of total dynamic head, and indefinite dry-running capabilities, the CD200M can be found in a wide variety of applications from straight dewatering to sewage bypassing. Mounted on a highway trailer, the CD200M is both maneuverable and versatile, making it a favorite of contractors, municipalities, industry and environmental companies across the country.

## Features

- Close coupled centrifugal pump with vacuum priming compressor mounted to a diesel engine. Also available in electric drive or as bare shaft pumpend.
- All cast iron construction with cast chromium steel impeller.
- Extensive application flexibility — will handle raw sewage, slurries and liquids with solids up to 3" (75mm) in diameter.
- Continuously operated "Godwin" air ejector priming device requiring no periodic adjustment or control.
- Dry running, oil bath, mechanical seal with abrasion-resistant, solid silicon carbide interfaces.
- Solids handling ball type Non Return Valve with renewable flexible rubber seat and quick release access feature.
- Compact unit mounted on skid base or two wheeled highway trailer both incorporating integral overnight running fuel tank.
- Simple maintenance — normally limited to checking engine and seal cavity oil levels.
- Standard engine — John Deere 4045D or Caterpillar 3054NA. Also available with a variety of engines including Hatz and Deutz.
- Critical silence unit available for use in environments requiring minimal noise.
